

# PAN TILT

## TS-PT-06 SERIES

TS-PT-06 is a manual positioner unit capable of moving in two axes to positions where precise positioning and alignment is required. It is a product that stands out with its ease of use and lightness.

### FEATURES

- All parts are machined on CNC machines.
- 6000 series aluminum and stainless steel are used.
- Corrosion resistant coating and painting processes have been made.
- 2X M6 mounting interface is available.
- It has the ability to move in 2 axes.
- Gradual precision measurement values are available on the Tilt axis.

### Technical data

Payload Capacity	15 kg
Weight	2 kg
Pan Axis Movement	n × 360° (Lockable)
Tilt Axis Movement	90° (+110° / -45°) (Lockable)
Material	6000 series aluminum and stainless steel
Connecting Interface	2X M6 SCREWS
